FRAMED DOORS PROFILE

- Easy installation and change of glass.

THE COMPACT MODEL IS ENGINEERED TO PROVIDE THE HIGHEST PERFORMANCE IN TERMS OF ROBUSTNESS, WHILE PAYING CLOSE ATTENTION TO AESTHETICS.

Installation uses a bead system with extremely simple profiles, allowing the operator and frames to be installed first, followed by the glass with framed profiles. This streamlines assembly and shortens delivery times.

Framed profiles are assembled using bolted joints.

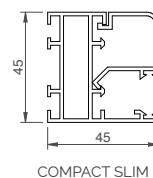

To seal the movable panels, the system includes a rounded-edge frame and a brush gasket, enhancing both sealing and safety.

When the door opens, the rounded overlap reduces the risk of snagging or injury.

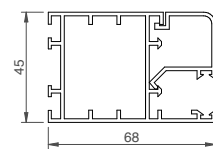

The closing and overlapping profiles are 8 mm wide, ensuring greater sealing when the door is closed. Their rounded design helps prevent damage in case of impact or entrapment between door panels.

The glass gaskets are made from EPDM coextruded profiles.

COMPACT profiles offer enough flexibility to create door panels with mullions, transom windows, or various configurations according to installation requirements.

TECHNICAL FEATURES

	COMPACT SLIM	COMPACT SENDO
Dimensions: Depth (D) x Height (H)	Horizontal profile 45x45 mm	Horizontal profile 45x68 mm
	Vertical profile 45x45 mm	Vertical profile 45x68 mm
Material	Aluminium	
Standard colour	Silver	
Max. door leaf size	2800 mm / 160 kg	3000 mm / 180 kg
Leaf width	Min. 500 mm - Max.1600 mm	Min. 500 mm - Max.2000 mm
Glass fastening	Snap-in profile	
Fastening to carrier	Fixed carrier bracket	
Glass thickness	6 mm - 26 mm**	
Mechanical manual lock	Not available	Optional ZSEG6

The new range of operators is compatible with Erreka profiles and is available in customised finishes.
