FRAMELESS DOORS PROFILE

- Maximum elegance.
- Interior visibility.

PROVIDES ENTRANCES WITH MAXIMUM ELEGANCE AND INTERIOR VISIBILITY

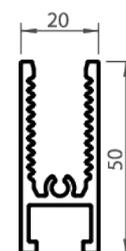

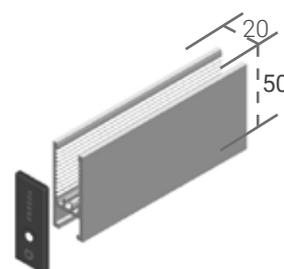

The PINZA clip model provides architectural appeal and a clean glass appearance.

It is designed for doors where frames must be avoided for aesthetic reasons, and full glass is the best option.

This model is ideal for interior entrances, especially for offices.

The PINZA profile can be installed at the top and bottom, or only at the top, and is bonded to the glass using a special silicone adhesive.

It is supplied with a plastic cover to ensure that the door leaves meet smoothly, leaving a small gap to prevent the panels from striking against each other.
